Document Title: Gut Friend™ OEM Product Requirement Specification (PRS) & Request for Quotation (RFQ)	文件名称：Gut Friend™ OEM 产品需求规范（PRS）及报价请求（RFQ）
Prepared by: Gut Begleitet Group GmbH	编制单位：Gut Begleitet Group GmbH
Document Version: Version 1.0	文件版本：Version 1.0
Document Status: Confidential – For Approved OEM Manufacturing Partners Only	文件状态：机密文件——仅供获批准的 OEM 制造合作伙伴使用
Target Market: European Union	目标市场：欧盟
Product Category: AI Tabletop Communication Companion	产品类别：AI 桌面通信陪伴设备

Engineering Guiding Principle /工程设计指导原则

Develop the simplest possible product that delivers the greatest value to the user. Eliminate unnecessary complexity. Prioritise reliability, affordability, ease of use and scalability over mechanical sophistication.	开发最简单、最实用、最具价值的产品。避免不必要的复杂设计，将可靠性、经济性、易用性和可扩展性置于机械复杂性之上。

Appendices A–G contain supporting reference information. Certain appendices may be updated or expanded during the engineering and product development process.

中文附录 A–G 为本文件的参考资料。随着产品设计和开发工作的推进，部分附录内容将逐步补充和更新。

Design Objective: Develop the most affordable, reliable and scalable AI communication companion for older adults, fully compliant with European regulations and designed for longterm integration within the Gut Begleitet Digital Ecosystem.	设计目标：开发一款面向老年用户、价格经济、性能可靠、易于规模化生产的AI 通信陪伴设备，全面符合欧洲法规，并可长期集成到 Gut Begleitet 数字生态系统中。
--	---

GUT FRIEND /Part 1/ Product Concept & Design Philosophy 产品概念与设计理念

Product Positioning	产品定位
Gut Friend is an AI-powered tabletop communication companion, not a traditional robot. The product is designed to provide natural voice interaction, emotional companionship, family communication and access to the Gut Begleitet digital ecosystem.	Gut Friend 是一款基于人工智能的桌面通信陪伴设备，而非传统机器人。产品旨在提供自然语音交互、情感陪伴、家庭沟通以及连接 Gut Begleitet 数字生态系统。
Design Philosophy	设计理念
The focus of the product is intelligent communication rather than mechanical movement. Budget should be invested in high-quality audio, reliable electronics, AI software and an excellent user experience instead of unnecessary mechanical features.	产品设计重点在于智能通信，而不是机械运动。研发预算应优先投入高质量音频、可靠电子系统、人工智能软件以及卓越的用户体验，而不是不必要的机械结构。
Simple and Reliable	简洁可靠
The first-generation product should be compact, elegant, easy to use and highly reliable, with the minimum number of components required to achieve the best customer experience.	第一代产品应结构紧凑、外观简洁、操作简单，并以最少的硬件组件实现最佳用户体验和最高可靠性。
Cost Optimisation	成本优化
Every engineering decision should support the lowest possible manufacturing cost while maintaining product quality, reliability and full European regulatory compliance.	每一项工程设计都应以实现最低制造成本为目标，同时保证产品质量、可靠性以及符合欧洲法规要求。
Cloud-Based AI	云端人工智能
AI processing should primarily be cloud-based to minimise hardware cost and enable future AI model upgrades without replacing the device.	AI 运算 应主要依赖云端，以降低硬件成本，并支持未来 AI 模型升级，而无需更换设备。
Modular Architecture	模块化架构
The hardware and software architecture should allow future expansion without redesigning the complete product. Optional features should be added as modules.	硬件和软件架构应支持未来扩展，无需重新设计整机。新增功能应采用模块化方式实现。
Human-Centred Design	以人为中心的设计

The product is designed primarily for older adults. Every interaction should be simple, intuitive, reassuring and accessible regardless of technical ability.	产品主要面向老年用户。所有交互设计应简单、直观、令人安心，并适合不同技术水平的用户使用。
Voice First	语音优先
Voice communication is the primary user interface. A display is not required for the first generation. Video communication can be provided through a television or other connected device.	语音交互是主要用户界面。第一代产品无需显示屏。视频通信可通过电视或其他连接设备实现。
Privacy & Security	隐私与安全
The product shall fully comply with GDPR and European cybersecurity requirements. Personal information belongs to the user and shall always be protected.	产品必须完全符合 GDPR 及欧洲网络安全法规要求。用户个人信息归用户所有，并始终受到保护。
Long-Term Platform	长期平台战略
Gut Friend is not a standalone product. It is the physical communication interface of the Gut Begleitet ecosystem, connecting users with Family, Community, Club, Caregivers and future AI services.	Gut Friend 并非独立产品，而是 Gut Begleitet 数字生态系统的物理交互终端，将用户与家庭、社区、俱乐部、护理人员及未来 AI 服务连接起来。

GUT FRIEND part 2 Product Objectives & Core Requirements / 产品目标与核心要求

Primary Objective	主要目标
Develop a low-cost AI communication companion specifically designed for older adults living independently. The device should reduce loneliness, improve wellbeing, support independent living and provide easy access to family and community services.	开发一款专为独立生活老年人设计的低成本 AI 通信陪伴设备。该设备应减少孤独感、提升生活质量、支持独立生活，并方便连接家庭及社区服务。
Target Market	目标市场
European Union, beginning with Austria and Germany, followed by expansion into other European countries.	首先面向奥地利和德国市场，随后扩展至整个欧洲市场。
Product Category	产品类别
AI Voice Communication Companion	AI 语音通信陪伴设备
Target Users	目标用户
Older adults living independently, seniors experiencing loneliness, family caregivers, healthcare providers and community organisations.	独立生活的老年人、孤独老人、家庭照护者、医疗机构及社区服务组织。
Main User Interface	主要用户界面
Natural voice conversation with simple physical controls. No technical knowledge should be required.	自然语音交互配合简单实体按键，无需任何技术知识即可使用。
Ease of Use	易用性

The product should operate with one-touch or voice activation. All functions must be simple and intuitive.	产品应支持一键操作或语音激活，所有功能必须简单直观。
Design Goal	设计目标
Modern, friendly, elegant and non-medical appearance suitable for any home environment.	外观现代、友好、简洁，不应具有医疗设备外观，可自然融入家庭环境。

Core Functional Requirements / 核心功能要求

AI Conversation	AI 自然对话
Emotional companionship	情感陪伴
Daily conversation	日常交流
Family communication	家庭沟通
Voice messaging	语音留言
Television video call integration (future)	电视视频通话（未来版本）
Medication reminders	用药提醒
Appointment reminders	日程提醒
Calendar reminders	日历提醒
Birthday reminders	生日提醒
Emergency assistance	紧急求助
Wellness check-in	日常健康问候
Memory support	记忆辅助
Orientation reminders	日期、时间及日程提醒
Community announcements	社区通知
Club activities	俱乐部活动
Local information	本地信息
Weather forecast	天气预报
News updates	新闻资讯
Public transport information	公共交通信息
Simple entertainment	简单娱乐（故事、笑话、音乐等）
Brain training exercises	认知训练
AI wellbeing coaching	AI 健康陪伴指导

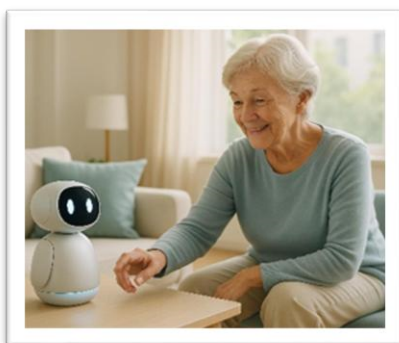

Engineering Design Priorities / 工程设计优先事项

Priority	English	中文
1	Lowest possible manufacturing cost	最低制造成本
2	High reliability	高可靠性
3	Excellent voice quality	优秀语音质量
4	Easy operation for seniors	老年人易于使用
5	Full EU compliance	符合欧盟法规
6	Long product lifetime	长使用寿命
7	Low maintenance cost	低维护成本
8	Modular upgrades	模块化升级
9	Remote software updates	远程软件升级
10	Scalable production	支持大规模生产

Cost Optimisation Strategy / 成本优化策略

English	中文
Every component should be selected based on value, reliability and long-term availability rather than maximum technical performance.	每个零部件应优先考虑价值、可靠性及长期供货能力，而不是追求最高性能。
Use proven, mass-produced components available from multiple suppliers to reduce cost and supply-chain risk.	优先采用成熟的大批量标准元器件，以降低成本和供应链风险。
Avoid unnecessary motors, cameras, displays and mechanical systems in Generation 1.	第一代产品避免使用不必要的电机、摄像头、显示屏及复杂机械结构。
Use cloud-based AI services whenever practical to minimise hardware requirements.	在可行情况下采用云端 AI 服务，以降低本地硬件需求。
Design the product for easy assembly, servicing and future upgrades.	产品设计应便于组装、维护及未来升级。
Keep the Bill of Materials (BOM) as low as possible while maintaining European quality standards.	在满足欧洲质量标准的前提下，将物料清单（BOM）成本控制到最低。

**GUT FRIEND / part 3 Hardware & Software Technical Requirements /硬**

件与软件技术要求

1. Hardware Platform/ 硬件平台

Design Objective	设计目标
Develop a compact, reliable and low-cost tabletop AI communication companion designed for continuous daily operation in private homes.	开发一款紧凑、可靠、低成本的桌面 AI 通信陪伴设备，适用于家庭环境长期稳定运行。
Form Factor	产品形态
Round or square tabletop enclosure with a modern, friendly appearance. No moving mechanical parts.	圆形或方形桌面外壳，外观现代、亲切，无任何机械运动部件。
Housing Material	外壳材料
Injection moulded ABS or ABS/PC plastic with matte finish.	注塑 ABS 或 ABS/PC 工程塑料，哑光表面处理。
Colour	颜色
Neutral white, silver or light grey suitable for home environments.	白色、银色或浅灰色，适合家庭环境。
Dimensions	尺寸
Approximately 120–180 mm diameter or width. Height below 100 mm.	直径或宽度约 120–180 毫米，高度小于 100 毫米。
Weight	重量
Approximately 400–800 grams.	约 400–800 克。

2. Electronics / 电子系统

English	中文
Processor: Low-power ARM processor capable of supporting AI voice interaction, speech recognition and cloud-based AI services while minimizing power consumption.	处理器：采用低功耗 ARM 处理器，支持 AI 语音交互、语音识别及云端 AI 服务，同时保持低功耗运行。
Memory: Minimum 4 GB RAM. 8 GB preferred if cost targets can be maintained.	内存：最低 4GB RAM；如成本允许，建议采用 8GB RAM。
Storage: Minimum 32 GB Flash storage for operating system, software and future updates.	存储：最低 32GB Flash 存储空间，用于操作系统、应用程序及未来软件升级。
Operating System: Linux preferred. Android acceptable if long-term support and security updates are available.	操作系统：优先采用 Linux；如具备长期支持及安全更新，可采用 Android。
Boot Time: Complete system startup within 30 seconds.	启动时间：系统启动时间应不超过 30 秒。
Continuous Operation: Designed for reliable 24/7 continuous operation with high system stability.	持续运行：产品应支持 7×24 小时连续稳定运行。

3. Audio System / 音频系统

Microphones: Four to six far-field digital microphones with beamforming technology.	麦克风：配备 4 至 6 个远场数字麦克风，支持波束成形技术。
--	---------------------------------

Voice Pickup: Reliable voice recognition from a minimum distance of 5 metres under normal indoor conditions.	语音拾取：在正常室内环境下，支持最少 5 米距离的可靠语音识别。
Echo Cancellation: Acoustic echo cancellation (AEC) required.	回声消除：必须支持声学回声消除 (AEC)。
Noise Reduction: Intelligent background noise suppression required.	降噪：必须具备智能环境噪声抑制功能。
Loudspeaker: High-quality full-range speaker optimized for clear speech reproduction for elderly users.	扬声器：高品质全频扬声器，针对老年用户语音播放进行优化。
Voice Quality: Clear, natural and highly intelligible speech with adjustable volume.	语音质量：语音播放应清晰、自然、易于理解，并支持音量调节。

4. Connectivity / 通信连接

Wi-Fi: Dual-band Wi-Fi supporting both 2.4 GHz and 5 GHz networks.	Wi-Fi： 支持 2.4GHz 和 5GHz 双频无线网络。
Bluetooth: Bluetooth Version 5.0 or higher.	蓝牙：支持 Bluetooth 5.0 或更高版本。
USB: USB-C connector for power, software maintenance and diagnostics.	USB： USB-C 接口，用于供电、软件维护及设备诊断。
Ethernet: Optional wired Ethernet interface if required by customer.	以太网：根据客户需求，可选配有线网络接口。
4G / 5G: Optional communication module for future mobile connectivity.	4G / 5G： 可选移动通信模块，用于未来蜂窝网络连接。

中文

5. User Controls / 用户操作 English

Power Button: Physical power button and restart.	电源按钮：实体电源按钮，用于开机、关机及系统重启。
Emergency (SOS) Button: Large, emergency button that is easy for elderly to find and operate.	紧急求助按钮（ SOS ）：大尺寸、醒目标识，方便老年用户快速找到并操作。
Volume Controls: Dedicated physical volume control button. Voicecontrolled volume adjustment supported.	音量控制：配备独立实体音量按键，同时支持语音调节音量。
Microphone Privacy Button: Dedicated button to disable microphones with visual indication.	麦克风隐私按钮：配备独立硬件静音按钮，并提供明显状态指示。
LED Status Ring: Multi-colour LED ring indicating power status, listening mode, AI processing, voice playback, software updates, connectivity and system status.	LED 状态灯环： 多色 LED 灯环，用于显示电源状态、语音监听、AI 处理、语音播放、软件升级、网络连接及系统故障。

6. AI Software Platform / AI 软件平台

English	中文
Software Architecture: Modular and scalable software architecture supporting future functional expansion without redesign.	软件架构：模块化、可扩展的软件架构，支持未来功能扩展，无需重新设计核心系统。
AI Models: Compatible with ChatGPT, DeepSeek, Qwen, Doubao, Claude, Gemini and future Large Language Models (LLMs).	AI 模型： 兼容 ChatGPT、DeepSeek、Qwen、豆包（Doubao）、Claude、Gemini 及未来大型语言模型（LLM）。
API: Fully documented Open API for third-party integration and ecosystem connectivity.	API： 提供完整文档的开放 API，支持第三方系统及生态平台集成。
SDK: Complete Software Development Kit (SDK) with documentation, sample code and engineering support.	SDK： 提供完整的软件开发工具包（SDK）、技术文档、示例代码及工程支持。
OTA Updates: Secure Over-the-Air firmware and software updates with automatic rollback protection.	OTA 升级： 支持安全 OTA 固件及软件升级，并具备升级失败自动回滚功能。
Cloud Platform: Cloud-provider independent architecture supporting deployment on European cloud platforms.	云平台：云平台架构不依赖单一供应商，可部署于欧洲云服务平台。
Remote Device Management: Centralized device monitoring, diagnostics, configuration management and remote maintenance.	远程设备管理：支持设备集中监控、远程诊断、配置管理及远程维护。

Engineering Cost Targets / 工程成本目标

Requirement	English	中文
BOM Cost	Minimise Bill of Materials while maintaining reliability.	在保证可靠性的前提下，尽量降低物料成本。
Assembly	Design for fast and simple assembly.	产品应易于快速组装。
Components	Use standard components available from multiple suppliers.	优先采用多家供应商均可提供的标准元件。
Maintenance	Minimise maintenance requirements through robust design and remote software updates.	通过可靠设计和远程升级减少维护需求。
Product Lifetime	Minimum five-year design life.	设计寿命不少于五年。

Chief Engineering Requirement（首席工程要求）

The Gut Friend shall not be engineered as a traditional consumer robot. It shall be engineered as a low-cost, highly reliable AI communication appliance with excellent voice interaction, seamless cloud connectivity, and full integration into the Gut Begleitet digital ecosystem. Every engineering decision shall prioritize simplicity, reliability, scalability, and cost efficiency while ensuring compliance with European regulations and user expectations.

Gut Friend 不应按照传统消费机器人进行设计，而应作为一款低成本、高可靠性的 **AI** 通信终端进行开发，重点实现卓越的语音交互、稳定的云端连接以及与 **Gut Begleitet** 数字生态系统的无缝集成。所有工程设计决策均应优先考虑简洁性、可靠性、可扩展性和成本效益，同时确保符合欧洲法规和用户需求。

GUT FRIEND / Part 4 – Functional Requirements Specification / 第四部分：功能需求规范

4.1 AI Communication AI 智能通信

Function	English Requirement	中文要求
Natural Conversation	Conduct natural, context-aware conversations with the user.	能够与用户进行自然、具有上下文理解能力的对话。
Continuous Conversation	Maintain conversation context during extended dialogue.	在连续对话中保持上下文理解能力。
Multi-language Support	Support multiple European languages with future expansion.	支持多种欧洲语言，并支持未来扩展。
Voice Recognition	Recognize individual users by voice where supported.	在支持情况下能够识别不同用户的声音。
Voice Response	Speak naturally using high-quality text-to-speech.	使用高质量语音合成进行自然语言回复。
Personality Adaptation	Adapt responses to the user's personality and preferences.	根据用户个性和偏好调整回复方式。
Learning Preferences	Learn user routines and preferences over time.	持续学习用户的生活习惯和偏好。

4.2 Emotional Companion 情感陪伴

Function	English Requirement	中文要求
Emotional Detection	Detect emotional tone through speech analysis.	通过语音分析识别用户情绪。
Loneliness Detection	Identify signs of loneliness or social isolation.	识别孤独或社交隔离迹象。
Emotional Support	Provide encouraging and supportive conversation.	提供积极、关怀性的交流。
Daily Greeting	Greet the user every morning.	每天早晨主动问候用户。
Daily Check-in	Ask how the user is feeling each day.	每天主动询问用户身体及心情状况。
Friendly Conversation	Engage in casual conversation to reduce loneliness.	主动进行轻松交流，缓解孤独感。
Storytelling	Tell stories when requested.	根据用户需求讲故事。
Jokes	Tell jokes and humorous stories.	提供笑话和轻松娱乐内容。

4.3 Memory Support /记忆辅助

Function	English Requirement	中文要求
----------	---------------------	------

Memory Exercises	Offer cognitive and memory training exercises.	提供记忆训练及认知锻炼。
Orientation	Remind user of today's date, time and day of week.	提醒当前日期、时间及星期。
Daily Schedule	Inform user of planned activities.	提醒当天的日程安排。
Family Names	Remember names and relationships of family members.	记住家庭成员姓名及关系。
Birthday Reminders	Remind user of birthdays and anniversaries.	提醒生日及纪念日。
Personal History	Remember important personal information when authorised.	在用户授权下记住重要个人信息。

4.4 Family Communication 家庭沟通

Function	English Requirement	中文要求
Voice Calling	Initiate voice calls to approved contacts.	向授权联系人发起语音通话。
Message Sending	Send voice or text messages.	发送语音或文字信息。
Message Reading	Read incoming messages aloud.	朗读收到的信息。
Television Video Call	Connect video calls through compatible Smart TV systems.	通过兼容智能电视实现视频通话。
Family Announcements	Receive family notifications and updates.	接收家庭通知及消息。

4.5 Daily Assistance 日常生活助手

Function	English Requirement	中文要求
Weather	Provide current weather and forecasts.	提供天气预报。
News	Read selected news summaries.	播报新闻摘要。
Traffic	Provide local traffic information when requested.	提供本地交通信息。
Public Transport	Provide public transport information.	提供公共交通信息。
Recipes	Read recipes step-by-step.	分步骤朗读菜谱。
Shopping Lists	Create and manage shopping lists.	创建及管理购物清单。
Calendar	Manage appointments and reminders.	管理日历及预约。

4.6 Health & Wellbeing 健康与福祉

Function	English Requirement	中文要求
Medication Reminder	Remind users to take medication and request confirmation.	提醒服药并要求确认。

Appointment Reminder	Remind users of medical appointments.	提醒医疗预约。
Blood Pressure Integration	Support compatible blood pressure monitors.	支持兼容血压计。
Pulse Monitoring	Integrate with compatible pulse sensors.	支持兼容脉搏监测设备。
Oxygen Monitoring	Support compatible blood oxygen sensors.	支持兼容血氧监测设备。
Mood Monitoring	Track mood trends through user interaction.	通过日常交流分析情绪变化。
Wellness Advice	Provide general wellbeing guidance (non-medical).	提供一般健康生活建议（非医疗建议）。

4.7 Safety Functions 安全功能

Function	English Requirement	中文要求
Emergency SOS	Activate emergency assistance by button or voice command.	通过按钮或语音启动紧急求助。
Emergency Contacts	Notify predefined emergency contacts.	通知预设紧急联系人。
Daily Safety Check	Perform daily wellbeing check.	每日进行安全问候。
Inactivity Detection	Detect prolonged inactivity and generate alerts.	检测长时间无活动并发出提醒。
Fall Detection	Support external fall detection devices and future integrated sensors.	支持外部跌倒检测设备及未来集成传感器。
Emergency Conversation	Continue communicating with the user until help arrives.	在救援到达前持续与用户保持沟通。

4.8 Future Expansion 未来扩展

Function	English Requirement	中文要求
Smart Home	Future integration with home automation systems.	未来支持智能家居系统。
Healthcare Services	Future integration with healthcare providers.	未来支持医疗服务平台。
Community Platform	Connect to the Gut Begleitet Community platform.	连接 Gut Begleitet 社区平台。
Club Services	Connect to Gut Begleitet Club services.	连接 Gut Begleitet Club 服务。
Family Portal	Connect to Family Portal.	连接家庭门户。
Caregiver Portal	Connect to Caregiver Portal.	连接护理人员门户。
Booking Platform	Connect to booking and appointment systems.	连接预约及预订系统。

Membership System	Integrate with membership management.	集成会员管理系统。
-------------------	---------------------------------------	-----------

Chief Functional Requirement / 首席功能要求

Gut Friend shall function as an intelligent, trusted AI companion that enhances independence, reduces loneliness, strengthens family connections, and provides seamless access to the complete Gut Begleitet ecosystem. Every function shall be designed with simplicity, reliability, affordability, and ease of use for older adults as the primary design objectives.	Gut Friend 应作为一位值得信赖的智能 AI 陪伴伙伴，帮助老年人提升独立生活能力、缓解孤独感、加强家庭联系，并无缝连接 Gut Begleitet 完整数字生态系统。所有功能设计均应以简洁、可靠、经济和适合老年人使用为首要目标。
---	---

GUT FRIEND Part 5 – Gut Begleitet Ecosystem Integration / 第五部分：Gut Begleitet 数字生态系统集成**5.1 System Architecture 系统架构**

System Purpose	系统目标
Gut Friend is the primary physical communication interface connecting users with the complete Gut Begleitet digital ecosystem.	Gut Friend 是连接用户与 Gut Begleitet 完整数字生态系统的主要物理交互终端。
The device shall operate as a secure cloud-connected AI companion rather than a standalone consumer product.	本设备应作为安全的云端 AI 陪伴终端运行，而非独立消费电子产品。
All services shall be accessible through simple voice interaction.	所有服务均应通过简单自然的语音交互完成。
The platform shall support future expansion without hardware redesign.	平台应支持未来功能扩展，无需重新设计硬件。

5.2 Gut Begleitet Platform Integration / Gut Begleitet 平台集成

Platform	English Requirement	中文要求
Gut Friend AI	Primary AI communication interface.	AI 智能通信核心平台。
Gut Begleitet Community	Access community activities, announcements and local events.	连接社区活动、公告及本地资讯。
Gut Begleitet Club	Access member benefits, events and exclusive services.	提供会员权益、活动及专属服务。
Family Portal	Secure communication between users and family members.	用户与家庭成员之间的安全沟通平台。

Caregiver Portal	Secure communication with professional caregivers.	与专业护理人员进行安全沟通。
Calendar System	Synchronise appointments and daily schedules.	同步日历、预约及日程安排。
Booking Platform	Schedule appointments and community services.	预约各类服务及社区活动。
Membership System	Manage subscriptions and membership benefits.	管理会员资格及订阅服务。

5.3 Family Services 家庭服务

English	中文
Voice communication with family members.	与家人进行语音交流。
Send and receive voice messages.	发送及接收语音留言。
Read incoming text messages aloud.	朗读收到的文字信息。
Receive family reminders and announcements.	接收家庭提醒及通知。
Future television video call integration.	未来支持电视视频通话。
Family wellbeing notifications.	家庭健康及安全通知。

5.4 Community Services 社区服务

English	中文
Community news and announcements.	社区新闻及公告。
Local activities and events.	本地活动及社区项目。
Volunteer services.	志愿者服务。
Shopping assistance.	购物协助。
Transport services.	交通服务。
Meal delivery services.	餐饮配送服务。
Home support services.	居家支持服务。

5.5 Health & Wellbeing Services /健康与福祉服务

English	中文
Medication reminder services.	用药提醒服务。
Appointment management.	医疗预约管理。
Health device integration.	健康设备连接。
Wellness coaching.	健康生活指导。
Cognitive wellbeing programmes.	认知健康训练。

Future telehealth integration.	未来远程医疗服务。
--------------------------------	-----------

5.6 AI Services AI 服务

English	中文
Natural AI conversation.	AI 自然语言交流。
Personal assistant functions.	AI 个人助理功能。
Memory assistance.	记忆辅助。
Emotional companionship.	情感陪伴。
Translation services.	多语言翻译服务。
Daily information services.	日常资讯服务。
Knowledge assistance.	知识问答服务。
Future AI applications.	未来 AI 应用扩展。

5.7 Third-Party Integration 第三方系统集成

English	中文
Open API for third-party developers.	向第三方开发者提供开放 API。
Integration with healthcare providers.	对接医疗服务机构。
Smart home compatibility.	支持智能家居平台。
Payment platform integration (future).	未来支持支付平台。
Insurance service integration (future).	未来支持保险服务。
Government digital services (future).	未来支持政府数字服务。

5.8 Cloud Platform Requirements 云平台要求

English	中文
Cloud provider independent architecture.	云平台架构不依赖单一供应商。
Support deployment on European cloud infrastructure.	支持部署于欧洲云服务平台。
High system availability.	高可用性。
Automatic backup and recovery.	自动备份与恢复。

Secure encrypted communications.	全程加密通信。
Scalable cloud architecture.	可扩展云平台架构。

5.9 Future Ecosystem Expansion 未来生态系统扩展

English	中文
Additional AI services.	新增 AI 服务。
Smart healthcare integration.	智慧医疗集成。
Smart home automation.	智能家居控制。
Wearable device integration.	可穿戴设备连接。
Mobility services.	出行服务。
E-commerce integration.	电子商务平台。
Digital marketplace.	数字服务市场。
Future software modules.	未来软件模块扩展。

Platform Architecture Principle 平台架构原则

Gut Friend shall function as the intelligent communication gateway to the complete Gut Begleitet Gut Friend 应作为连接 Gut Begleitet 完整 ecosystem. The device shall remain hardware-simple 数字生态系统的智能通信入口。设备本 while continuously expanding its capabilities through 身保持硬件简单，通过云服务、人工智 cloud services, AI technologies and platform integration. 能及平台集成持续扩展功能。该架构能 This approach minimises hardware cost, simplifies 够最大限度降低硬件成本、简化生产、 manufacturing, extends product life and enables rapid 延长产品寿命，并实现无需更换设备即 deployment of new services without replacing the 可快速部署新服务。 device.

The Gut Friend hardware is intentionally designed to remain simple and cost-effective. The long-term value of the product is created through software, artificial intelligence, cloud services, and integration with the Gut Begleitet ecosystem—not through increasingly complex hardware. The OEM should therefore prioritise reliability, audio quality, network stability, and software extensibility over mechanical complexity.

中文

Gut Friend 的硬件设计理念是保持简单、可靠且具有成本效益。产品的长期价值来自软件、人工智能、云服务以及与 **Gut Begleitet** 数字生态系统的深度集成，而不是复杂的机械结构。因此，**OEM** 制造商应优先关注产品的可靠性、语音质量、网络稳定性以及软件可扩展性，而非增加复杂的机械设计。

GUT FRIEND / Part 6 – Security, Privacy & European Regulatory Compliance 第六部分：安全、隐私与欧洲法规符合性

6.1 Design Philosophy 设计理念

Security and privacy shall be designed into the product from the beginning and shall not be added later.	产品的安全性和隐私保护必须从设计初期开始考虑，而不是后期增加。
The device shall comply with all applicable European regulations for connected consumer products.	产品必须符合所有适用于欧洲联网消费电子产品的法规要求。
User trust, privacy and data security shall be fundamental design principles.	用户信任、隐私保护和数据安全应作为产品设计的基本原则。

6.2 Data Privacy (GDPR) 数据隐私 (GDPR)

Full compliance with the EU General Data Protection Regulation (GDPR).	完全符合欧盟《通用数据保护条例》(GDPR)。
Personal data shall remain under user control.	用户应始终拥有个人数据控制权。
Personal data shall only be collected when necessary.	仅收集提供服务所必需的个人数据。
User consent shall be obtained before collecting or processing personal data.	在收集或处理个人数据前必须获得用户授权。
Users shall be able to view, export and delete their personal data.	用户应能够查看、导出及删除个人数据。
Personal information shall never be sold or shared without explicit consent.	未经用户明确授权，不得出售或共享个人信息。

6.3 Cyber Security 网络安全

Secure Boot required.	必须支持安全启动 (Secure Boot)。
Digitally signed firmware required.	固件必须采用数字签名。
Encrypted firmware updates.	固件升级过程必须加密。
Secure OTA update process.	支持安全 OTA 远程升级。
Automatic rollback after failed update.	升级失败时自动恢复至上一版本。
Device authentication required.	设备必须具备身份认证机制。
Secure device provisioning during manufacturing.	制造阶段必须采用安全设备初始化流程。

Regular security patch capability.	支持定期安全补丁更新。
------------------------------------	-------------

6.4 Data Security 数据安全

TLS 1.3 encrypted communication.	所有通信采用 TLS 1.3 加密。
Encrypted cloud communication.	云端通信必须加密。
Secure storage of user credentials.	用户凭据必须安全存储。
Passwords shall never be stored in plain text.	密码不得以明文形式存储。
Encryption keys shall be securely managed.	加密密钥必须安全管理。
Local data shall be protected against unauthorised access.	本地数据必须防止未经授权访问。

6.5 Cloud Requirements 云平台要求

Cloud infrastructure shall support European deployment.	云平台必须支持部署于欧洲。
Customer data shall be stored in accordance with European data protection requirements.	用户数据存储必须符合欧洲数据保护法规。
Cloud provider shall support high availability.	云平台应具备高可用性。
Secure backup and disaster recovery required.	必须支持安全备份及灾难恢复。
Cloud services shall be independent of any single technology provider.	云服务不得依赖单一技术供应商。

6.6 Artificial Intelligence Requirements / 人工智能要求

AI platform shall support multiple Large Language Models (LLMs).	AI 平台应支持多个大型语言模型 (LLM)。
AI services shall be replaceable without hardware redesign.	更换 AI 服务时无需重新设计硬件。
AI-generated responses should be appropriate, respectful and suitable for older adults.	AI 回复内容应适合老年用户，尊重且易于理解。
AI decision-making shall remain transparent wherever possible.	AI 决策过程应尽可能保持透明。
Future compliance with the European AI Act shall be supported.	产品应支持未来符合《欧盟人工智能法案》的要求。

6.7 European Compliance 欧洲法规符合性

Requirement	中文
CE Certification	CE 认证

RED Directive	RED 无线设备指令
EMC Directive	EMC 电磁兼容指令
RoHS Directive	RoHS 有害物质限制指令
REACH Regulation	REACH 化学品法规
WEEE Directive	WEEE 废弃电子电气设备指令
EN IEC 62368-1 Product Safety	EN IEC 62368-1 产品安全标准
Bluetooth Compliance	蓝牙认证
Wi-Fi Compliance	Wi-Fi 认证
Cyber Resilience Act Ready	符合欧盟网络韧性法案要求
European AI Act Ready	符合欧盟人工智能法案要求

6.8 Privacy by Design /隐私保护设计

Privacy shall be considered throughout the entire product lifecycle.	隐私保护应贯穿整个产品生命周期。
Users shall always know when the device is listening.	用户应始终知道设备何时处于监听状态。
Microphone mute shall completely disable voice capture.	麦克风静音后应完全停止语音采集。
Visual indicators shall clearly show device status.	应通过明显的指示灯显示设备工作状态。
Privacy settings shall be simple and easy to understand.	隐私设置应简单直观，方便用户理解。

6.9 Engineering Security Principles 工程安全原则

The Gut Friend platform shall be designed according to internationally recognised cybersecurity best practices. Security shall be integrated into hardware, firmware, software and cloud services from the beginning of development. The system shall remain secure throughout its operational lifetime through continuous software updates and vulnerability management.	Gut Friend 平台应按照国际公认的网络安全最佳实践进行设计。安全机制必须从开发初期集成到硬件、固件、软件及云平台中，并通过持续的软件更新和漏洞管理确保产品在整个生命周期内保持安全。
---	--

Chief Compliance Requirement (核心法规要求)

English

Gut Friend is designed for deployment throughout the European Union. Therefore, full compliance with European legislation, cybersecurity standards, privacy regulations and future AI regulations shall be considered mandatory product

requirements. These requirements shall be incorporated into the product architecture from the earliest stages of development and manufacturing.

中文

Gut Friend 面向整个欧盟市场，因此必须全面符合欧盟法规、网络安全标准、数据隐私要求以及未来人工智能相关法规。这些要求必须在产品设计、开发及制造的最初阶段纳入整体架构，而不是后期补充。

GUT FRIEND / Part 7 European Certification & Quality Requirements/ 第七部分：欧洲认证与质量要求

7.1 Product Compliance Philosophy 产品合规理念

Gut Friend is intended for commercial deployment throughout the European Union. All hardware, software and wireless communications shall comply with applicable European regulations before mass production.	Gut Friend 面向整个欧盟市场销售。所有硬件、软件及无线通信功能在量产前必须符合欧盟相关法规要求。
Certification shall be considered part of the product design process and not a postdevelopment activity.	产品认证应作为设计开发的一部分，而不是产品完成后的补充工作。
The OEM shall provide engineering support during certification and regulatory approval.	OEM 制造商应在认证及法规审批过程中提供工程技术支持。

7.2 Mandatory European Certifications 欧盟强制认证

Certification	English Requirement	中文要求
CE Marking	Product shall obtain CE certification before commercial sale.	产品上市前必须取得 CE 认证。
RED Directive (2014/53/EU)	All wireless functions shall comply with the Radio Equipment Directive.	所有无线通信功能必须符合 RED（无线设备指令）。
EMC Directive (2014/30/EU)	Product shall comply with electromagnetic compatibility requirements.	产品必须符合电磁兼容（EMC）要求。
RoHS Directive	Components shall comply with hazardous substance restrictions.	所有零部件必须符合 RoHS 有害物质限制要求。
REACH Regulation	Materials shall comply with European chemical safety regulations.	所有材料必须符合 REACH 化学品法规。
WEEE Directive	Product shall support European electronic waste recycling requirements.	产品必须符合 WEEE 废弃电子设备回收要求。

7.3 Product Safety Standards 产品安全标准

Standard	English Requirement	中文要求
EN IEC 62368-1	Product safety standard for ICT and AV equipment.	信息通信及音视频设备安全标准。

Electrical Safety	Safe operation under all specified operating conditions.	产品在所有规定工作条件下应安全运行。
Power Supply Safety	External power supply shall comply with EU safety requirements.	外部电源必须符合欧盟安全标准。
Fire Safety	Housing materials shall meet applicable fire-resistance requirements.	外壳材料应符合相关阻燃要求。
Mechanical Safety	Product shall contain no hazardous sharp edges or unsafe mechanical parts.	产品不得存在尖锐边缘或危险机械结构。

7.4 Wireless Certification 无线通信认证

English Requirement	中文要求
Wi-Fi radio certification.	Wi-Fi 无线认证。
Bluetooth certification.	蓝牙认证。
Radio frequency testing.	射频测试。
Antenna performance validation.	天线性能验证。
Wireless coexistence testing.	无线共存测试。

7.5 Software & Cybersecurity Compliance 软件及网络安全要求

Secure software development process.	采用安全的软件开发流程。
Secure firmware updates.	支持安全固件升级。
Software version traceability.	软件版本可追溯。
Vulnerability management process.	建立漏洞管理机制。
Long-term software maintenance.	提供长期软件维护支持。
Compliance with future EU cybersecurity regulations.	支持符合未来欧盟网络安全法规。

7.6 Quality Management Requirements 质量管理要求

Manufacturer shall operate under ISO 9001 Quality Management System.	制造商应具备 ISO 9001 质量管理体系。
ISO 14001 environmental management preferred.	建议具备 ISO 14001 环境管理体系。
Production quality inspection required.	产品必须进行生产质量检验。
Functional testing of every device before shipment.	每台设备出货前必须进行功能测试。

Full product traceability by serial number.	每台产品应具备完整序列号追溯能力。
---	-------------------

7.7 Manufacturing Documentation 制造文件要求

English Requirement	中文要求
Complete Bill of Materials (BOM).	提供完整物料清单 (BOM)。
Assembly drawings.	提供装配图。
PCB documentation.	提供 PCB 文件。
Firmware documentation.	提供固件技术文件。
Software release documentation.	提供软件版本发布文件。
Test reports.	提供测试报告。
Certification reports.	提供认证报告。
User manuals in English.	提供英文用户手册。

7.8 Packaging Requirements 包装要求

Environmentally friendly packaging.	环保包装材料。
Recyclable packaging materials.	可回收包装材料。
Retail packaging suitable for European markets.	符合欧洲市场要求的零售包装。
CE marking displayed on product and packaging.	产品及包装须标注 CE 标志。
Multilingual labels and safety information.	多语言标签及安全说明。

7.9 OEM Deliverables OEM 应交付内容

English	中文
CE Declaration of Conformity	CE 符合性声明
Test Reports	测试报告
Product Certificates	产品认证证书
Material Compliance Reports	材料符合性报告
Software Version Documentation	软件版本文件

Hardware Documentation	Revision	硬件版本文件
User Manual		用户手册
Service Manual		维修手册
Manufacturing Quality Reports		制造质量报告
Warranty Documentation		保修文件

7.10 Product Quality Objectives 产品质量目标

Objective	English Requirement	中文要求
Reliability	Product designed for a minimum operational life of 5 years.	产品设计寿命不少于 5 年。
Availability	System availability greater than 99%.	系统可用率高于 99%。
OTA Success Rate	Firmware update success rate above 99%.	OTA 升级成功率高于 99%。
Warranty	Minimum 24-month warranty for EU markets.	欧盟市场不少于 24 个月保修。
Serviceability	Remote diagnostics to minimise maintenance costs.	支持远程诊断，降低维护成本。

Chief Quality Requirement 核心质量要求

English

Gut Friend shall be designed, manufactured and certified to meet the highest standards of quality, reliability and safety while maintaining the lowest practical manufacturing cost. The objective is to deliver a robust, affordable and scalable AI communication companion suitable for long-term deployment across the European Union.

中文

Gut Friend 应按照高质量、高可靠性和高安全性的标准进行设计、制造和认证，同时保持最低可行制造成本。目标是打造一款坚固耐用、经济实惠、可规模化生产的 **AI** 通信陪伴设备，适用于欧盟长期推广和应用。

GUT FRIEND / Part 8 – OEM Manufacturing & Commercial Requirements

第八部分：OEM 制造与商务要求

8.1 Manufacturing Philosophy /制造理念

Gut Friend shall be manufactured as a high-quality, low-cost AI communication companion designed specifically for the European market.	Gut Friend 应制造成为一款面向欧洲市场的高品质、低成本 AI 通信陪伴设备。
--	---

Manufacturing processes shall prioritise reliability, consistency, scalability and cost efficiency.	制造过程应优先考虑可靠性、一致性、可扩展性及成本效率。
The product shall be designed for long-term production with stable component availability.	产品应支持长期生产，并确保关键元器件长期供应。

8.2 OEM Manufacturing Requirements / OEM 制造要求

OEM and private-label manufacturing required.	支持 OEM 及贴牌生产。
Product shall be manufactured under the Gut Friend brand.	产品以 Gut Friend 品牌生产。
Manufacturer shall support custom firmware and software.	支持定制固件及软件开发。
Manufacturer shall provide engineering support during development.	在开发过程中提供工程技术支持。
Long-term manufacturing commitment (minimum 5 years).	承诺不少于 5 年的持续生产支持。
Spare parts availability for minimum 5 years after production.	停产后至少提供 5 年备件供应。

8.3 Engineering Support / 工程支持

Dedicated engineering project manager.	指定专属工程项目经理。
Hardware engineering support.	提供硬件工程支持。
Firmware development support.	提供固件开发支持。
Software integration support.	提供软件集成支持。
Technical documentation in English.	提供英文技术文件。
Regular engineering meetings during development.	开发期间定期召开工程会议。

8.4 Product Customisation 产品定制

English Requirement	中文要求
Custom enclosure branding.	定制外壳品牌标识。
Gut Friend logo moulding or printing.	Gut Friend Logo 模具或印刷。
Custom packaging.	定制包装。
European language support.	支持欧洲多语言。
Custom startup screen or voice greeting.	定制启动界面或欢迎语。
Custom firmware configuration.	定制固件配置。

**8.5 Intellectual Property 知识产权**

English Requirement	中文要求
Gut Friend software remains the property of Gut Begleitet Group.	Gut Friend 软件知识产权归 Gut Begleitet Group 所有。
Gut Friend trademarks remain the property of Gut Begleitet Group.	Gut Friend 商标归 Gut Begleitet Group 所有。
Manufacturer shall not sell identical products using Gut Friend software or branding.	制造商不得销售使用 Gut Friend 软件或品牌的相同产品。
Confidential information shall remain protected.	所有保密信息必须受到保护。
NDA required before technical information exchange.	技术资料交换前须签署保密协议（NDA）。

8.6 Production Volumes 生产计划

Production Stage	Estimated Quantity	中文
Engineering Prototype	10–20 units	工程样机
Functional Prototype	50 units	功能样机
Pilot Production	200–500 units	小批量试产
Initial Commercial Production	1,000 units	首批量产
Annual Production	5,000–20,000 units	年产量目标
Future Expansion	50,000+ units	未来规模化生产

8.7 Cost Objectives 成本目标

English Requirement	中文要求
Lowest practical Bill of Materials (BOM).	在保证质量前提下实现最低 BOM 成本。
Standard components preferred.	优先采用标准化元器件。
Multiple component suppliers preferred.	优先采用多供应商方案。
Minimise tooling complexity.	尽量降低模具复杂度。
Design for easy assembly.	产品应便于快速组装。
Minimise production labour cost.	降低人工装配成本。

8.8 Production Quality 生产质量

English Requirement	中文要求
100% functional testing before shipment.	出货前进行 100% 功能测试。
Serial number traceability.	产品序列号可追溯。
Manufacturing quality records maintained.	保留完整生产质量记录。
Failure analysis support.	提供故障分析支持。
Continuous quality improvement programme.	建立持续质量改进机制。

8.9 Warranty & Service 保修与售后服务

Minimum 24-month product warranty.	至少提供 24 个月产品保修。
Spare parts available for minimum 5 years.	至少提供 5 年备件供应。
Remote diagnostics supported.	支持远程诊断。
Firmware maintenance throughout product life.	产品生命周期内持续提供固件维护。
Engineering support after production launch.	产品上市后继续提供工程技术支持。

8.10 OEM Proposal Requirements /OEM 报价要求

The manufacturer shall provide the following information with their proposal./制造商在报价时应提供以下信息

Technical feasibility assessment	技术可行性评估
Recommended hardware platform	推荐硬件平台
Software development estimate	软件开发工作量评估
Tooling investment	模具费用
NRE (Non-Recurring Engineering) cost	一次性工程开发费用 (NRE)
Prototype cost	样机成本
Unit price at 500 units	500 台单价
Unit price at 2,000 units	2,000 台单价
Unit price at 5,000 units	5,000 台单价
Unit price at 10,000 units	10,000 台单价
Production lead time	生产交期

Certification support	认证支持
Warranty conditions	保修条款

Chief Manufacturing Requirement 核心制造要求

The selected OEM partner shall act as a long-term strategic manufacturing partner rather than simply a contract manufacturer. The objective is to jointly develop a reliable, affordable and scalable AI communication companion that can be manufactured efficiently, continuously improved and successfully deployed throughout Europe. The partnership shall focus on quality, innovation, cost optimisation and long-term cooperation.	所选择的 OEM 制造商应作为长期战略合作伙伴，而不仅仅是合同制造商。双方的共同目标是开发一款可靠、经济、可规模化生产的 AI 通信陪伴设备，并持续优化产品，成功推广至整个欧洲市场。合作应建立在质量、创新、成本优化及长期合作的基础之上。
---	--

GUT FRIEND / Part 9 – Request for Quotation (RFQ) & OEM Development Response**第九部分：报价请求（RFQ）及 OEM 开发回复****9.1 Purpose 目的**

This Request for Quotation (RFQ) accompanies the Gut Friend Product Requirement Specification (PRS). The purpose is to enable the OEM manufacturer to evaluate the technical feasibility, development effort, manufacturing capability and commercial proposal required to produce the Gut Friend AI Communication Companion for the European market.	本《报价请求》（RFQ）作为《Gut Friend 产品需求规范》（PRS）的组成部分，旨在帮助 OEM 制造商评估开发 Gut Friend AI 通信陪伴设备所需的技术可行性、研发工作量、制造能力及商务方案，以满足欧洲市场需求。
---	--

9.2 Requested OEM Response OEM 回复内容

Please provide detailed information for each of the following items.请针对以下各项提供详细回复。

Information Requested	中文
Technical feasibility assessment	技术可行性评估
Recommended hardware platform	推荐硬件平台
Recommended processor	推荐处理器
Memory recommendation	推荐内存配置
Software architecture recommendation	软件架构建议
AI platform recommendation	AI 平台建议
Estimated engineering development time	预计研发周期
Estimated software development effort	软件开发工作量评估
Estimated firmware development effort	固件开发工作量评估

Estimated certification schedule	认证时间计划
Manufacturing readiness	制造准备情况
Production capacity	年生产能力
Recommended improvements	产品优化建议

9.3 Commercial Proposal 商务报价

Information Requested	中文
NRE (Non-Recurring Engineering) Cost	一次性工程开发费用 (NRE)
Prototype Cost	样机费用
Tooling Cost	模具费用
Certification Support Cost	认证支持费用
Firmware Development Cost	固件开发费用
Software Development Cost	软件开发费用
Unit Price – 500 Units	500 台单价
Unit Price – 1,000 Units	1,000 台单价
Unit Price – 2,000 Units	2,000 台单价
Unit Price – 5,000 Units	5,000 台单价
Unit Price – 10,000 Units	10,000 台单价
Annual Cost Reduction Proposal	年度成本优化建议

9.4 Production Information 生产信息

Information Requested	中文
Prototype Lead Time	样机交付周期
Pilot Production Lead Time	试产周期
Mass Production Lead Time	量产周期
Monthly Production Capacity	月生产能力
Maximum Annual Capacity	最大年产能
Minimum Order Quantity (MOQ)	最低订购数量 (MOQ)
Standard Warranty	标准保修期限
Spare Parts Availability	备件供应期限

**9.5 Engineering Support 工程支持**

Information Requested	中文
Dedicated Project Manager	是否提供专属项目经理
Hardware Engineering Support	是否提供硬件工程支持
Firmware Development Support	是否提供固件开发支持
Software Integration Support	是否提供软件集成支持
EU Certification Support	是否提供欧盟认证支持
Production Engineering Support	是否提供生产工程支持
After-Sales Engineering Support	是否提供售后工程支持

9.6 Quality & Manufacturing 质量与制造

Information Requested	中文
Manufacturing Certifications	制造体系认证
ISO 9001 Certification	ISO 9001 认证
ISO 14001 Certification	ISO 14001 认证
Factory Audit Available	是否接受工厂审核
Product Testing Process	产品测试流程
Traceability System	产品追溯系统
Incoming Quality Control	来料质量控制
Final Product Inspection	成品检验流程

9.7 Intellectual Property & Confidentiality 知识产权与保密

Requirement	中文
OEM shall maintain strict confidentiality regarding all Gut Friend technical information.	OEM 必须对 Gut Friend 所有技术资料严格保密。
No product may be copied or sold to third parties without written approval.	未经书面许可，不得复制或向第三方销售产品。
Gut Friend trademarks, software, cloud platform and ecosystem remain the exclusive property of Gut Begleitet Group.	Gut Friend 商标、软件、云平台及数字生态系统均归 Gut Begleitet Group 独家所有。

A Mutual Non-Disclosure Agreement (NDA) shall be signed before exchanging confidential technical information.	双方在交换保密技术资料前应签署保密协议（NDA）。
---	---------------------------

9.8 Manufacturer Declaration 制造商声明

We have reviewed the Gut Friend Product Requirement Specification and confirm that our proposal is based on the requirements contained within this document.	我们已认真审阅《Gut Friend 产品需求规范》，并确认本报价方案基于该文件中的全部要求。
We understand that the objective is to develop a low-cost, high-quality AI Communication Companion for long-term deployment throughout Europe.	我们理解，本项目目标是开发一款面向欧洲市场长期推广的低成本、高品质 AI 通信陪伴设备。
We will identify any technical limitations or recommended alternatives in our proposal.	我们将在报价中明确说明任何技术限制及建议的替代方案。

9.9 Requested Proposal Submission 报价提交内容

Please include the following documents with your quotation. .请随报价一并提交以下资料：

- Company Profile / 公司简介
- Product Portfolio / 产品介绍
- Similar OEM Projects / 类似 OEM 项目经验
- Engineering Team Overview / 工程团队介绍
- Factory Overview / 工厂介绍
- Production Capacity / 生产能力
- Quality Certifications / 质量认证
- Development Schedule / 开发计划
- Commercial Quotation / 商务报价
- References (if available) / 客户案例（如有）

Final Statement 最终说明

Gut Friend is intended to become Europe's leading AI communication companion for healthy ageing. We are seeking a long-term OEM manufacturing partner capable of delivering high quality, competitive pricing, continuous innovation and reliable production. The selected partner will participate in the future development of a scalable AI ecosystem serving older adults across Europe.	Gut Friend 致力于成为欧洲领先的健康养老 AI 通信陪伴设备。我们希望寻找一家能够提供高品质、具有竞争力成本、持续创新能力和稳定制造能力的长期 OEM 合作伙伴。入选合作伙伴将共同参与建设面向全欧洲老年人的可扩展 AI 数字生态系统。
---	---
